Designing an Effective Chart of Accounts for a TV Production Company

Step 1: Understand Your Business Structure

Begin by analyzing your company's operations, revenue models, and cost centers. Consider the types of productions, sources of income, and expenses involved.

Step 2: Establish Clear Account Naming Conventions

Use consistent and descriptive naming to facilitate reporting. For example, instead of generic names like "Production Expense," specify "Pre-Production Salaries" or "Set Construction."

Step 3: Use a Logical Numbering System

Implement a numbering hierarchy that groups related accounts. A common approach is:

- 1000s for Assets
- 2000s for Liabilities
- 3000s for Equity
- 4000s for Revenue
- 5000s for Expenses

Within expenses, further subdivisions can be made for production, admin, marketing, etc.

Step 4: Incorporate Project-Based Accounts

For TV production, tracking costs per project is essential. Include sub-accounts such as "Project X - Camera Equipment" or "Project Y - Location Fees."

Step 5: Regularly Review and Update

As your company evolves, update the COA to reflect new revenue streams, expense categories, or operational changes.
